Flossie Saunders

**mrs.
flossie
saunders**

dedication

this edition of el gato grande is dedicated to mrs. flossie saunders. she retired this june, which completed sixteen years at lake center.

when they made mrs. saunders, they threw away the mold. there is not and never will be another like her. the knowledge she imparted, the patience she exercised, the graciousness and charm she wore like a cloak will have made lasting impressions upon all with whom she came in contact. lake center will never be the same without her, but will certainly be a richer and better place for having been associated with her.

board of education

the board of education is the policy-making body of the little lake city school district elected by the citizens of the district. they meet at least two or three evenings a month and too often serve with little thanks for their efforts.

under the presidency of mr. dean lough, they have continued to try to provide us with the best education possible. lake center students are very important to our board members, many of whom have had children who passed through our school.

this year we thank them especially for being partners with the student council in paying to fence-in a bicycle enclosure which better protects student property.

administration

the school year 1971-72 saw the development of several new programs at lake center. perhaps most significant was the establishment of the reading laboratory which serves nearly one-fourth of our student body. through newer and more exciting means, we hope to motivate students to become better readers.

our opportunity room, a second new program, has given a group of students a chance to succeed when previously their future schooling was unpredictable.

introduction of an 'esl' class (english as a second language) was accomplished this year. students with a limited english background have intensive studies which allow them to move into regular classes more successfully.

seventh grade science became a full year course and other areas such as art, crafts and design, and music were modified and strengthened better to meet the needs of students.
